

NEW!

SATA® adam2 - Accurate Pressure Control

The SATA adam 2 displays the spray gun inlet pressure with an accuracy of +/- 0.05 bar. The pressure can be **precisely adjusted** via the large regulator tabs. All SATA paint spray guns equipped with an air micrometer can be retrofitted with the SATA adam 2. Thus, painters can keep the **pressure always under control** to ensure precise color matching and **high quality finishes**. Costly rework due to incorrect pressure setting is a thing of the past. The display always remains in the horizontal center position ensuring **perfect readability** of the pressure at all times.

Remove air micrometer

Insert the dock

Attach the display, "click" in place

SATAjet spray gun now ready with the adam 2

Digital readout of the SATA adam 2

New Design – High Flexibility

The SATA adam 2 consists of two separate components: The **SATA adam 2 dock** permanently replaces the air micrometer of the spray gun, allowing the precise adjustment of the inlet pressure. The second component, the **SATA adam 2 display**, is safely fitted to the "dock". It is equipped with high-precision measuring electronics and can be removed from the spray gun in no time at all; for example you can use it on another spray gun with a pre-mounted "dock". Thus, the SATA adam 2 is a **truly versatile piece of equipment**.

Furthermore, **investing in the digitalization** of existing non-digital spray gun stock is becoming **far less costly**: The "dock" is separately available as an accessory part. For gun cleaning in a gun washing machines, a simple, reliable click-in mechanism quickly releases the SATA adam 2 display from the dock. The display should then be cleaned using a cloth soaked with proper cleaning solution. The only difference between the **SATA adam 2** and the **SATA adam 2 mini** is the design of the "dock" shaft. The displays themselves are identical and can be swapped between both "dock" versions.

Further advantages

The SATA adam 2 weighs just 49 g. Every painter will appreciate its lightweight design. The user himself can now replace the battery easily and quickly. Any imminent battery exchange will be indicated on the display. The lifetime is now up to 30 % higher than before to reduce the need for battery replacement to a minimum.

The SATA adam 2 is EX-proof and ATEX approved

Use one of adam 2 with different guns equipped with the SATA adam 2 dock (shown with red protective cap)

The SATA adam 2 offers perfect spray gun handling

Item	Part #	List Price
SATA adam 2 	160853	\$ 269.00
