

# SATA Filters

## Clean Compressed Air for Perfect Finish Results

*High performance filter systems for ultimate air purification; A requirement in all shops.*

The SATA 400 modular filter product line is designed to meet the highest standards of quality and performance. The modular system allows the user to adapt to varying shop conditions and requirements.

Compressor oil, condensation, dust and scale in airlines will be thoroughly removed. SATA filter units provide 100% technically clean air, **bringing your spraying air to breathing air quality.** This is a necessity when spraying waterborne paint, the SATA 3-stage filter with activated charcoal provides that.

### Facts, Features, Benefits:

- High CFM volume capacity
- Convenient, precise pressure adjustment
- Fully automatic condensation discharge
- Particle filtration to 0.01 micron
- Fine filter saturation monitored by pressure differential
- Corrosion proof
- Heavy duty with metal filter housing for long service life
- Provides contaminate free air for waterborne and clean breathing air

**Costly re-do's are a thing of the past!**
